DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-29 and 50-58, drawn to a data structure stored on a computer media and a process for creating and managing a complex work order, classified in class 705, subclass 8.

II. Claims 30-49, drawn to a process for managing a complex work order, classified in class 705, subclass 9.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as scheduling first and second sub-order with a first and second appointment. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 3623

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. This application contains claims directed to the following patentably distinct species of the claimed invention:

Claims 8-11 are distinct species of the generic feature of wherein the precedence criteria identifies.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Claims 12-15 are distinct species of the generic feature of wherein the Q specific fields include.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

Art Unit: 3623

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Remarks

6. Applicant election with traverse of claims 1-29, and 50-58 filed April 4, 2005 is acknowledged. The traversal is on the ground(s) that claims 30-31 and 42-49 are similarly directed to a process for managing a complex work order and that claims 19 and 30 have the same limitations. In response, the examiner disagrees with applicant's arguments because claim 30 contains limitation such as appointment scheduling, which is not in claim 19. Thus applicant's argument is not found persuasive because the examiner has identified that two groups that are classified under different subclasses. In this instance, the examiner would be required to perform separate and different searches. Therefore, since the examiner would be required to perform separate and different prior art searches and since the groups are classified under different class and subclass, a substantial burden would fall on the examiner if all the claims are examined. The requirement is still deemed proper.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Romain Jeanty whose telephone number is (571) 272-6732. The examiner can normally be reached on Mon-Thurs 7:30 am - 6:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tariq R. Hafiz can be reached on (571) 272-6729. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
